I shared this with Tony already, but here is a list of facilities from ECHO in the DFW area that have RMPs and have EJ scores 7 or higher.

These inspections could be done as day trips where the inspectors can go home at the end of the day each day.

I did a search in ECHO of facilities in 6 surrounding counties of RMP facilities with EJ scores 7 or higher.

Take a look for our discussion.

That's what I understand...for any trips that will require air travel.

It would take us 8+ hours to drive to Corpus...and if we have to do it separately, it is just not going to be time or resource efficient.

I went in and deleted my TA in SharePoint and notified the travel folks what is going on.

Based on what Steve said, he wants us to focus initially on inspections we can drive to.

Steve, Cheryl and Justin (the union) are pressing management to allow vaxxed inspectors to drive together, but there are still the issues of folks who need respirator fit tests, expired medical monitoring and the status of the GOV vehicles.

I'll get with you on a call here shortly before the case meeting to see what our options are.

Diana – did I get this right? Is all travel moved back to August per Steve to include Javelina?

The work flow is in SharePoint. On the R6 main internet page click on the Airplane for Travel Resources, and then on the next page click on Region 6 Travel Site.

On the SharePoint page at the left click on Create Travel Request and then use the info I sent you to specify the air flights, hotel, rent car etc. It is running very slow. It took me almost 2 hours to get it submitted because the page loads so slow after each save. The travel group will not process a TA except through the SharePoint work flow, so that is why Sam told you not to do it directly in Concur. Diana

Diana – I see where you uploaded files on Teams – I'll review prior to departure – also did you send your travel request to Sherry Weiss or someone else on the travel team? Sam was telling me not to use Concur, but to send to management folks to upload our travel info. If you sent her a form can you send it to me so I can match your travel itinerary – if not I'll just use the travel information that you uploaded in Teams – thanks.
